

Dear Colleagues,

On behalf of the Climate Change Team under the Environment, Climate Change and Natural Resource Management (ECCNRM) Cluster of GIZ India, I am very pleased to share our third update of knowledge products. It comprises knowledge products of the last 6 months which are available in the public domain with focus on popular articles, select technical reports and media coverage of select events, with a view towards wider outreach of our work's outcomes and key learnings.

Your feedback and comments are welcome.

Regards,  
Vijeta Rattani

## Evolution of waste management in Panaji

BY VAIBHAV RATHI & SHABANA KAZI

The city of Panaji is considered to be a front-runner in solid waste management in the country, but it does have long chequered history in the way it has managed its waste over the years.

BEYOND MERE

LIC, Patto) were waste processing All of these w

### WHERE DOES MY WASTE GO?

As a waste generator, have you ever wondered how Panaji manages all the waste that you generate and

### Panaji 2.0: What lies ahead in its waste management journey

Like Panaji a zero waste city, segregation at source, decentralised waste management, carbon based interventions and smart infrastructure are going forward

Panaji: Frontrunner in waste segregation in India  
Segregation of waste at source literally has the ability to change the destiny of the waste we generate. The earlier we segregate in the value chain of waste management, the better our chances to divert it from getting disposed in a landfill.

One Health - but a whole lot of waste!  
Increasing waste generation coupled with inappropriate management of waste can have cascading negative impacts on the environment, economy, social life and public health. For a state like Goa that relies heavily on the tourism industry to drive its economy, it is highly imperative to maintain good aesthetic and environmental quality

16 WAYS TO SEGREGATE YOUR WASTE

Mineral Foundation of Goa under a UNDP project. Through this, the St. Inez Material Recovery Facility is receiving an upgrade in terms of automated machinery and complete professional management.

JOURNEY AHEAD  
26 housing colonies are upgrading their waste management

Impact of waste management on climate change  
What kind of a planet will our future generations inherit from us? A warmer, unstable and resource stressed planet, with frequent droughts, heat waves and storms rise in sea level, rising temperatures, are widespread and happy time. But how can Goa, one of the smallest states in the country contribute to solve the issue of such a planet?

### Can organic waste management at source benefit cities?

Sourabh Manuja, Nirbhay Kumar Singh and Kuldeep Choudhary | SEPTEMBER 06, 2020, 09:53 AM IST

#### This Gandhi Jayanti, why not go shopping with your waste in Panaji

Conceptualised by the CCP with support from GIZ and TERI, the campaign not only provides opportunities to help manage waste through citizen participation, but also create economic opportunities for entrepreneurs having space to deal in recyclable commodities

Sourabh Manuja and Vaibhav Rathi | SEPTEMBER 26, 2020, 08:55 PM IST

In India, about 7% of the waste generated gets recycled. That recycling of waste is where the economy of the country is in a good chain. They are in a good chain. They are in a good chain. They are in a good chain.

#### Goa's model on scientific waste management

The SWMF at Salgao serves as a best practice model for treating waste generated in a holistic manner incorporating the needs of all stakeholders associated with waste management - village panchayat and its employees

Mehankar and Shatanikar | SEPTEMBER 12, 2020, 06:07 PM IST

About ECCNRM The Environment, Climate Change and Natural Resource Management Programme of GIZ India supports communities, public and private institutions to improve and conserve natural resources, minimize risks from climate change and enhance rural livelihoods.
